

APRIL NEWSLETTER

BEAUTY, INSIGHTS, AND CELEBRATIONS

Welcome to our April newsletter! Spring is here at our practice and Dr. Joe Gryskiewicz, Dr. John Luck, and the entire Gryskiewicz Twin Cities Cosmetic Surgery team would like to share the latest trends with you, from the benefits of Earlobe Repair to the power of MOXI® Laser skin resurfacing treatments.

You'll also find expert tips, glowing patient reviews, and the latest updates about our "work family." Whether you're looking to reconstruct aging, wrinkled, or stretched earlobes — or make the radiant, healthy complexion you desire a reality — our team can help you achieve your goals through personalized service, patient-focused care, and the most cutting-edge aesthetic treatments available.

What's Inside:

- **Procedure Spotlight:** Earlobe Repair, for correcting the appearance of stretched, sagging, gauged, torn, or split earlobes.
- **All About MOXI® by Sciton:** Enjoy a smoother, healthier skin tone and texture by reducing sun damage, acne scarring, laxity, freckles, wrinkles, hyperpigmentation, age spots, and other common skin concerns—all without surgery or recovery time!
- **Patient Reviews:** Read real reviews and testimonials from patients just like you to gain insight into our high standards of care.
- **Staff Announcements:** Celebrate milestones and staff achievements with our team.

Procedure Highlight: Earlobe Repair

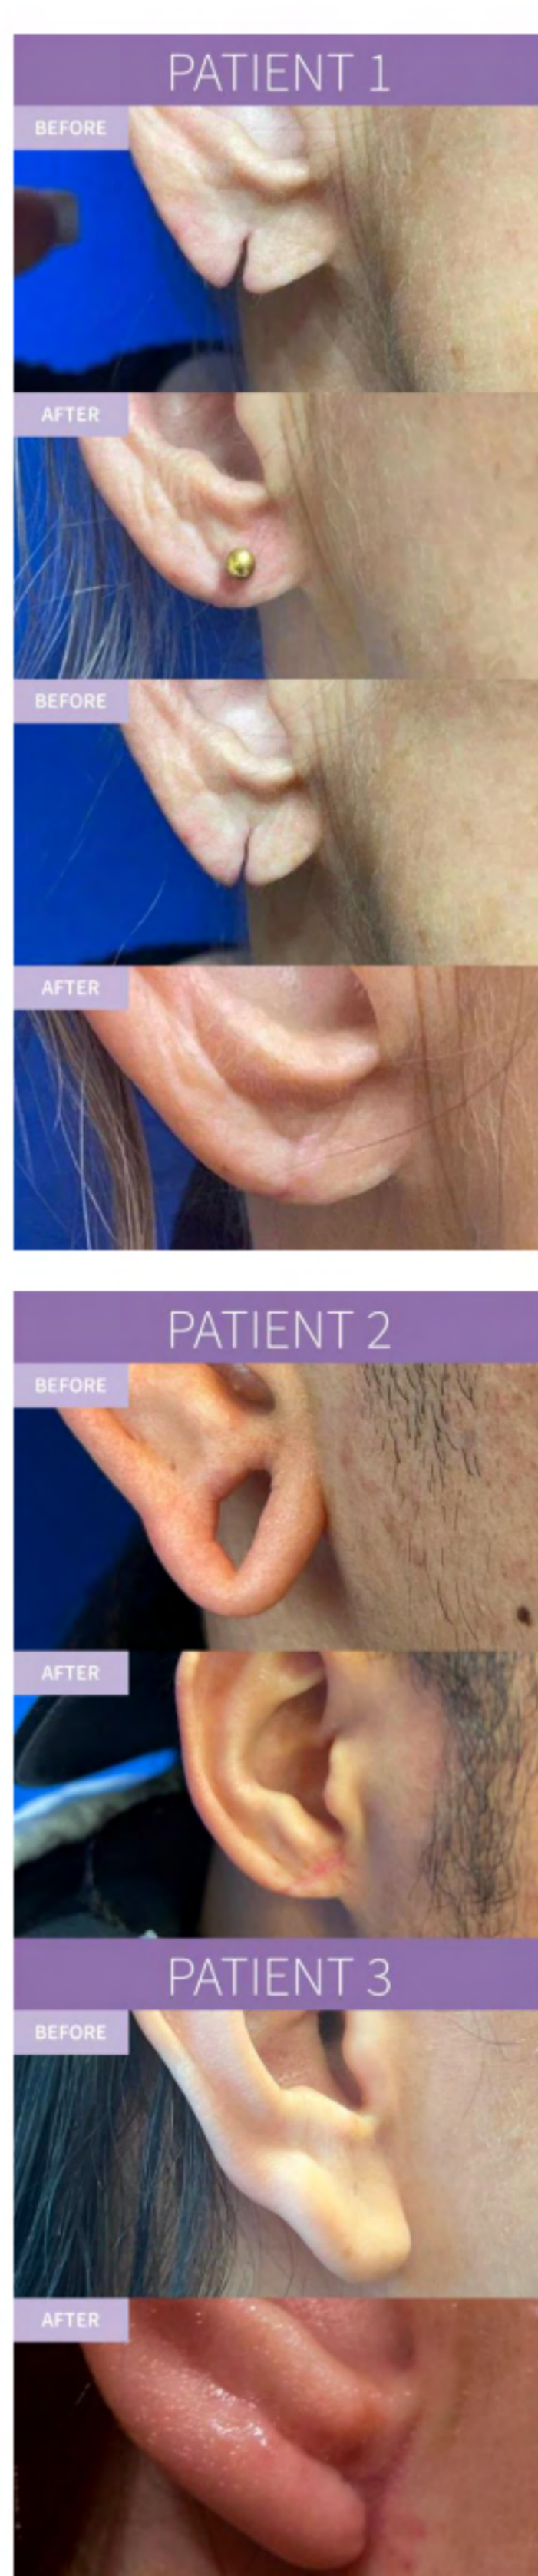

The earlobes age in conjunction with your other facial features, meaning they're susceptible to the effects of reduced collagen, gravity, heavy styling use, and other factors. Earlobe repair surgery can be a simple and predictable procedure to reconstruct stretched, split, torn, gauged, or bifid earlobes, restoring a natural-looking ear shape. The entire procedure is performed in-office under local anesthesia and usually takes less than one hour.

Overview of Earlobe Repair: Performed by Dr. Joe Gryskiewicz or Dr. John Luck, Earlobe Repair is an in-office surgery utilizing local anesthesia. Discreet incisions are hidden along the natural folds and contours of the ears to repair split or torn lobes. In situations involving severely stretched earlobes, a wedge of tissue may be removed to restore proportion. Patients return home on the same day as their procedure to recover from the comfort of their own home.

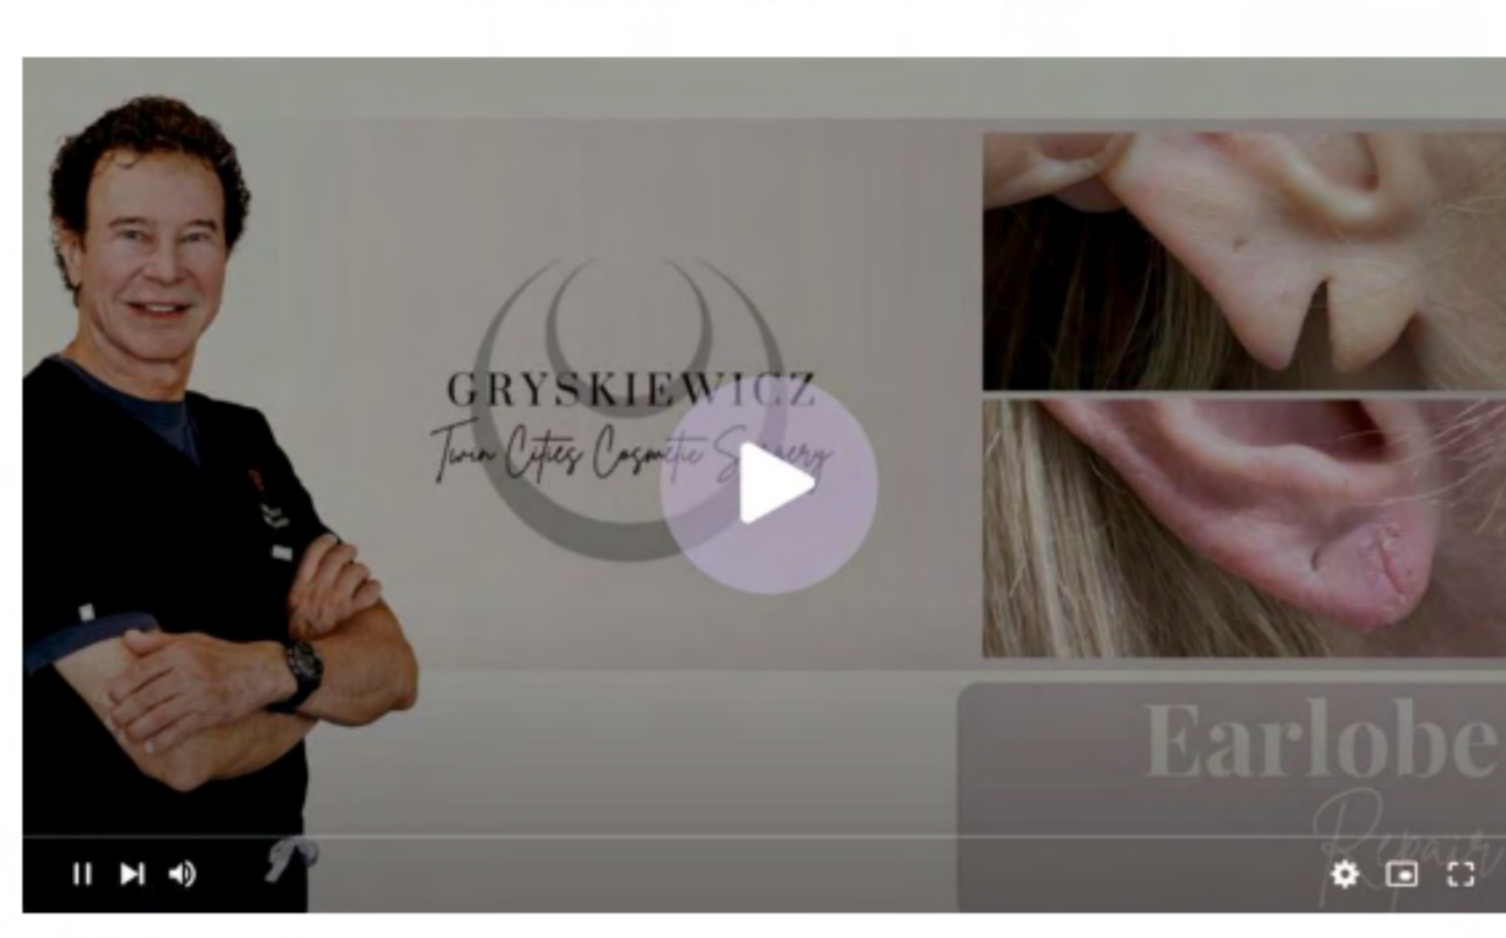

What are the Benefits of Earlobe Repair? This procedure can repair the earlobe itself or bring together stretched-out piercing holes. Benefits include:

- Takes place right here at our Burnsville office
- Relatively short, tolerable recovery
- Only requires local anesthesia
- Can be completed in 30 minutes to one hour
- May not require a consultation in certain cases

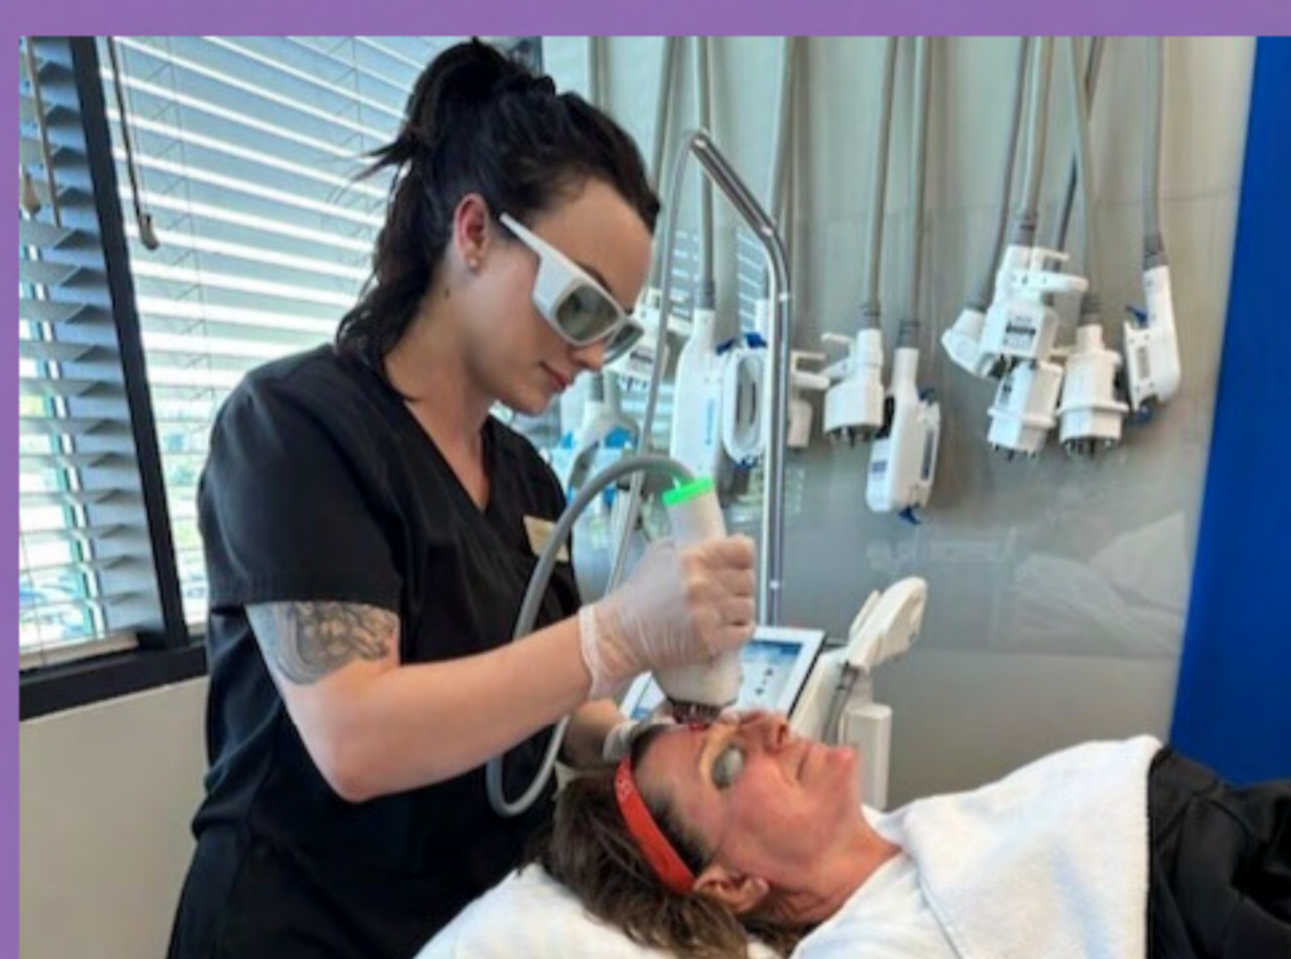

What Can I Expect From Recovery? Sutures are typically removed after seven days and patients feel well enough to return to work the very next day. Full healing of the earlobes often takes four to six weeks.

SPA Highlight: MOXI® by Sciton

MOXI® offers dynamic laser skin resurfacing to remove the damaged outer layer of the skin and achieve an improved tone and texture.

About

Using gentle light-based energy to promote the turnover of dead or dull skin cells, MOXI® can reveal a firmer and softer skin tone. First, a topical numbing agent is applied to improve patient comfort. The advanced mJoule® laser is guided over the planned treatment areas, emitting precise pulses of targeted light energy. This feels similar to a light snap or a mild sunburn. Once swelling subsides, patients are left with a healthy, rosy, and radiant glow.

Benefits

- MOXI® can help clear a variety of common skin imperfections, such as:
- Loose, sagging skin
 - Wrinkles, age spots, and sun damage
 - Rough skin texture or an uneven skin tone

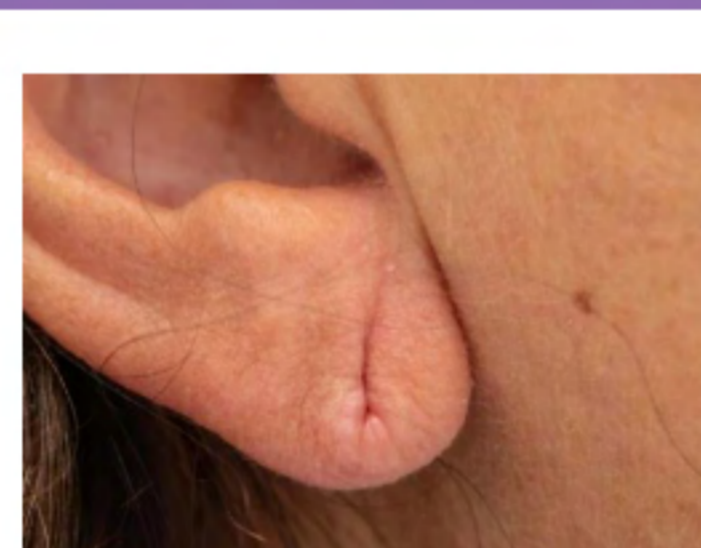

Recovery

While you may need to temporarily avoid sun exposure, there's no downtime necessary. Swelling can last two to four days. You can wear makeup the day after treatment.

Google Reviews

"It's been 7 months after my breast aug, & all I can say I love my results. They have fluffed and dropped beautifully. My girl friends who have natural breasts are considering surgery because of my results. I can't thank my surgeon enough for my results. Smooth healing process & yes my scars have healed amazingly too. Not even noticeable, you get more for your money. Confidence & the natural feeling. Thank you & your amazing team."

"A huge thank you to Dr. Joe, his team, and everyone at Ridges Surgery Center. Last Friday, I underwent a procedure using their quick recovery method, and it truly lived up to its name! The very next day, I was back in the office and visiting job sites. Since I'm completely pain-free I have to remind myself not to lift anything heavy. :) Thanks again Dr. Joe"

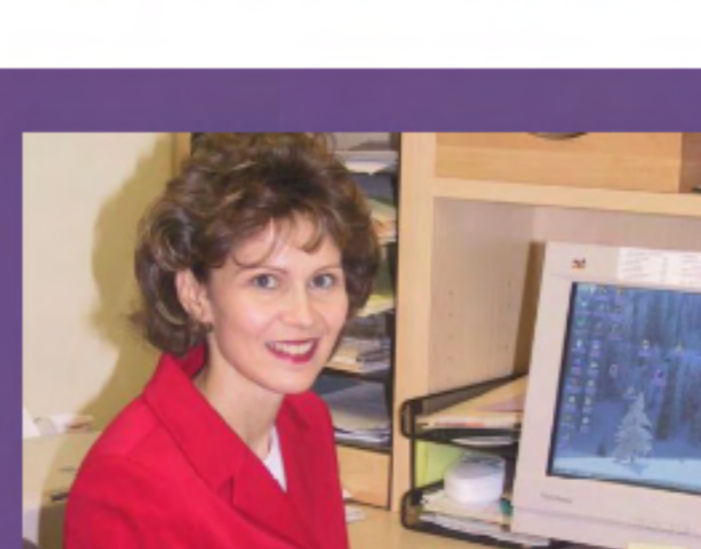

"Dr. Joe is the best! He's caring, compassionate and made sure I was comfortable with everything happening. My results are amazing. He is truly an artist at what he does and I would recommend him and his staff to anyone."
